What happens next: Hackathon journey

Before the Hackathon

- Form your team
- Define your idea

During the Hackathon

- Build your solution
- Validate your idea

After the Hackathon

- Pitch your project
- Unlock new opportunities

Team formation

Why teams matter

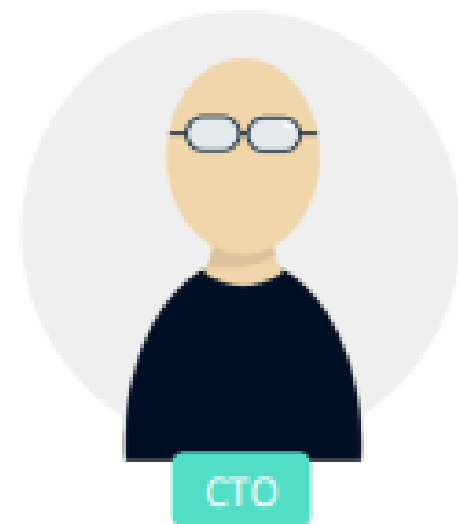

- Hackathons are team-based
- Multidisciplinary = better solutions

Ideal Team

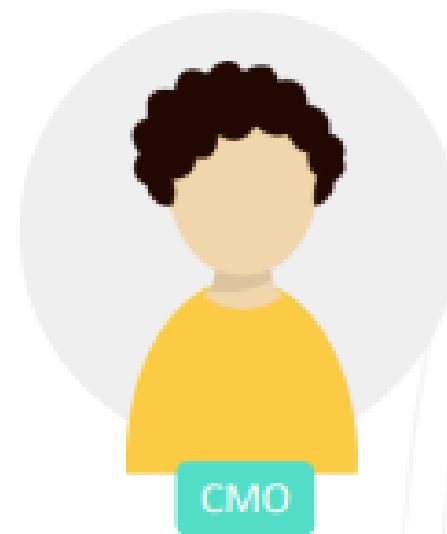

- 3-6 people
- Mix: Tech + Business + Domain

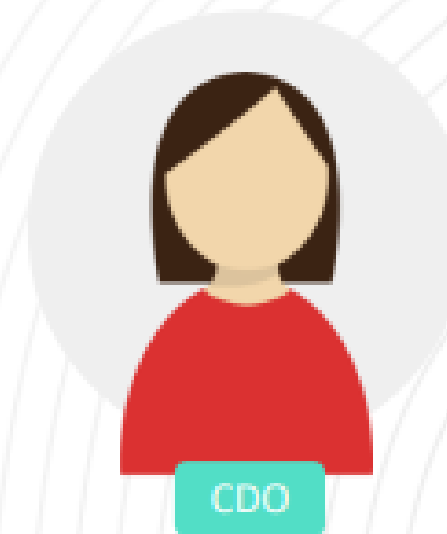

Leadership,
Management and
Business Development

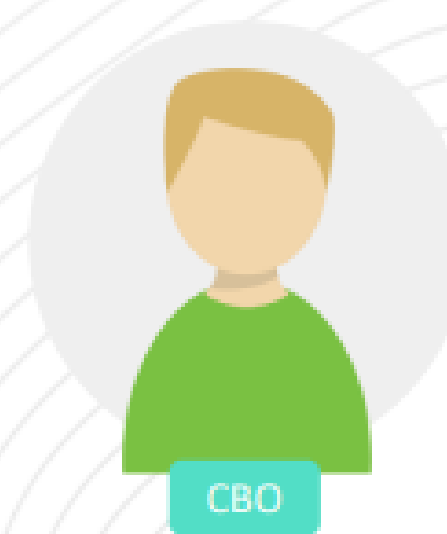

Technical EO Product
and Service
Development

Marketing, Pricing and
Sales

UI and UX Creative

Business Modelling and
Value Engineering

“Do you already have a team?”

Introduce yourself (quickly)

- Your background
- Your key skills
- What you’re interested in

CASSINI #EUSpace

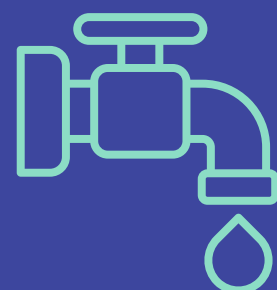

Hackathons & Mentoring

How to use TAIKAI (depending on your situation)

OPTION 1: YOU ALREADY HAVE A TEAM

- 1 Register in the same hackathon location
- 2 Create a project
- 3 Add all team members

OPTION 2: YOU HAVE AN IDEA, BUT NO TEAM

- 1 Create and publish your project
- 2 Describe the profiles you need
- 3 Indicate you are looking for teammates

OPTION 3: NO TEAM, NO IDEA (TOTALLY FINE!)

- 1 Complete your profile (skills are key)
- 2 Explore existing projects
- 3 Join a team that fits your profile

From challenge → idea

How to build your idea

- Problem (from Session 1)
- User
- Solution
- Use of space data

What makes a strong hackathon project

1. Solves a real problem
2. Uses space data meaningfully
3. Feasible in a weekend
4. Clear value

HACKATHON SCHEDULE

Friday – April 24

- 16:00** Registration & check-in
- 17:00** Local welcome
